Fidgets, why so popular?

by Blake Trasler

Fidget tools, spinners, cubes, popits, anything that can increase focus, reduce stress or provide mental occupation. These toys became popularized in 2017, and we're going to tell you why. These tools have sparked up quite a debate on the distractions they cause in classrooms, but they do provide multiple benefits for a child.

Things like anxiety or stress can affect the entire body, especially the hands. This

can result in shakiness and restlessness. While fidgets may not get rid of these issues, they certainly can help. This is because these tools are also calming mechanisms.

In conclusion, I believe these tools are very helpful. I am glad that they have become so popular over these past few years.

SPECIAL EVENTS

Things have been booming here with a Talent Show & SUPERBOWL 2021!

TALENT SHOW

We have an insanely talented group of people at our camp this year & we were so happy to get to see them show off their skills on stage at our talent show! We had over 20 different acts, and the most amazing thing was to hear the cheering coming from our audience sending love to all of the participants. We had a wide range of acts from dancing to singing and even some magic!

These included our staff as well as our campers & it was incredible! Keep checking out our website for videos to come soon of many of the different acts!

SUPERBOWL

We had the best time at our first Superbowl in 2 years! The kids had the best time refining their Football skills, and learning how to play football for the first time for many of our younger campers. It was an amazing battle between our two teams Alabama & Auburn, both teams gave it their all and in the end ALABAMA came out on top!
